

How do I use a link for a specific event or part of the event

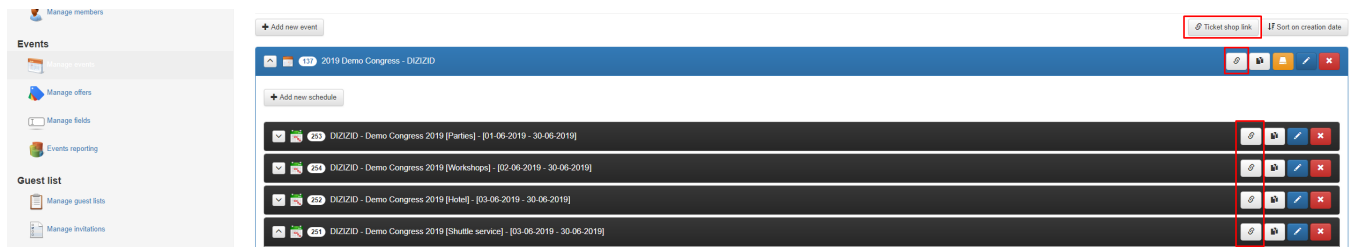

Sometimes you do not want to use the webshop link for an event. You want a webshop where you only see specific tickets. For instance if you have created a special event for the workshop or bootcamp part of your event. Within the Dizid system it is possible to use a specific link for:

- Your event. For instance a festival where you see all tickets for that festival. Example: If you organize parties and will also organize a festival it could be handy to have a ticket link where you see only the festival tickets.
- A schedule of your event: For instance only the workshops of that event. Example: If you organizer a party with bootcamp and want to do special promotion for the bootcamp it could be handy to only have a webshop with the bootcamp tickets.

In the system you can find the specific links for each part of your event in event management:

1. Login to the admin module
2. Go to **Manage events**
3. Search for your event

Behind each part of the event you see a link icon. If you click on the link your browser will open a specific webshop with only the ticket for that part of the event. Just copy the link to use it as a specific link.

Example: If we click on schedule level (DIZID - Demo Congress 2019 [Parties]) on the link at the end, the following webshop will open. In this webshop you only see the parties and the tickets that are valid for the parties.

June 2019

^ DIZIZID - Demo Congress 2019 [Parties]

Festival

Feel the energy of a festival which makes the whole town dance salsa. Beaches, hotels, streets, squares, islands - the whole town is a dance floor for a couple of thousands of visitors from all around the world, living and breathing salsa. Imagine, experience, be part of it!

📍 Galerija Adris - Rovinj
