

# Sales dashboard

As an organizer you want to be able to check realtime what the status of the ticket sales is for your event. In some situations you want to check how much you sold last event so you can compare this with the ticket sales this event. In the Dizizid system there is a sales dashboard. Here you can see how much ticket revenue is.

1. Login to the admin module
2. Go to **Sales dashboard**

Select the event you want to have a sales overview for. The system will calculate and give you an overview for the sales in a few seconds. If you have separate schedules, and timetables where tickets are linked to, you can get an even more detailed overview of your ticket sales.
