

Tickets & Offers

Offers are what we usually call tickets. But a ticket is just a proof of payment that gives you access to an event. So it is better to talk about offers. The offers make it possible to manage the prices you ask for the tickets you want to sell. Prices for tickets can change over time. In the Dizizid system you can create an offer which is linked to time periods and prices.

FAQ

- [How do I change the ticket price or add extra offer periods](#)

Single time table offer

You can have for instance a Friday party and for that party you only create one offer for the Friday party ticket.

The screenshot shows the Dizizid web application interface. On the left is a sidebar with navigation links: Locations (Manage locations), Members (Manage members), Events (Manage events), **Manage offers** (selected), Manage fields, Events reporting, Guest list (Manage guest lists, Manage invitations), Vouchers (Manage vouchers), and System (Settings, Credits). The main content area is titled 'Offers' and shows details for '345 Demo Congress - Friday Party'. It includes fields for 'Max number of tickets' (500), 'Max number of tickets per person' (9), and 'Description' (Ticket for the Friday Party). Below these are 'Offer periods' and 'Time tables' sections, both highlighted with red boxes. The 'Offer periods' table shows a single period from 15-12-2016 23:32 to 08-12-2017 21:00 with prices of €20.00 (presale), €25.00 (reservation), and €10.00 (paid guest list). The 'Time tables' table shows a single time table for the same event with a start time of 08-12-2017 21:00 and an end time of 09-12-2017 5:00.

Starts on	Ends on	Presale price	Reservation price	Paid guest list price
15-12-2016 23:32	08-12-2017 21:00	€20.00	€25.00	€10.00

Name	Start	End	Created	Actions
Demo Congress - Friday Party	08-12-2017 21:00	09-12-2017 5:00	15-12-2016 23:32	Delete

Multi time table offer

In some cases you can also have offers that are valid for more than one party. For instance a full pass for a festival. In this example you see that the Full Pass offer is valid for all parties and workshops during the weekend.

Multiple offer periods

The price of your offer can change over time and for instance become more expensive every month. To accommodate that you can add multiple "Offer periods". An offer period is basically a time frame which you configure with pricing information. The prices you configure will then only be valid in that specific time frame. So if you know up-front what the prices will be over time you can configure them directly. The webshop will detect which offer period is the active one and use those prices automatically.
